RE: PPC ISO Rate Change

The Henry County Fire Department recently opened fire station #16 located at 1575 Kelley Town Road in McDonough, Georgia. Residence located within 5 miles of the new fire station are now classified with a PPC Rating of 4.

The ISO's Public Protection Classification Program (PPC) plays an important role in the underwriting process at insurance companies. Insurers use PPC information as part of their decision-making when deciding what business to write, coverage's to offer, or prices to charge for personal or commercial property insurance.

Not only is Public Protection Classification important to communities, it is important to fire departments as well. Communities whose PPC improves may get lower insurance prices. PPC also provides fire departments with a valuable benchmark, and is used by many departments as a valuable tool when planning, budgeting and justifying fire protection improvements.

If you have any questions about your classification, please let us know.

Sincerely,

Luther Phillips  
Interim Fire Chief
